DETAILED ACTION

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 80/75/65 drawn to a disposable absorbent product with acidic functional groups and polymeric base materials, classified in class 604, subclass 367.
- II. Claims 80/75/69 drawn to a disposable absorbent product with acidic functional groups and non-polymeric base materials, classified in class 604, subclass 358.
- III. Claim 93, drawn to a disposable absorbent product with basic functional groups and non-polymeric acidic materials, classified in class 604, subclass 358.
- IV. Claims 66-68 and 76-79, drawn to an absorbent structure having acidic functional groups and polymeric basic materials, classified in class 428, subclass 221+.
- V. Claims 70-74 and 76-79, drawn to an absorbent structure having acidic functional groups and non-polymeric basic materials, classified in class 428, subclass 98+.
- VI. Claims 81-84, drawn to an absorbent structure with basic functional groups and polymeric acidic materials, classified in class 428, subclass 221+.
- VII. Claims 86-92, drawn to an absorbent structure with basic functional groups and non-polymeric acidic materials, classified in class 428, subclass 98+.

Inventions Groups I-III and Groups IV-VII are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations

Art Unit: 3761

(MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the disposable absorbent product could be produced utilizing a different absorbent pad such as, for example, a cellulose structure. The subcombination has separate utility such as, for example, for use in cleaning products.

Because these inventions are distinct for the reasons given above and the search required for Groups I-III is not required for Groups IV-VII, restriction for examination purposes as indicated is proper.

If Groups I or IV is elected, the linking claim is 65 and 75/65. The restriction requirement among the linked inventions is subject to the nonallowance of the linking claim, claim 75. Upon the allowance of the linking claim, the restriction requirement as to the linked inventions shall be withdrawn and any claim depending from or otherwise including all the limitations of the allowable linking claim will be entitled to examination in the instant application. Applicants are advised that if any such claim depending from or including all the limitations of the allowable linking claim is presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

If Groups II or V is elected, the linking claim is 69 and 75/69. The restriction requirement among the linked inventions is subject to the nonallowance of the linking claim, claim 75. Upon the allowance of the linking claim, the restriction requirement as to the linked

inventions shall be withdrawn and any claim depending from or otherwise including all the limitations of the allowable linking claim will be entitled to examination in the instant application. Applicants are advised that if any such claim depending from or including all the limitations of the allowable linking claim is presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

If Groups III or VII is elected, the linking claim is 85. The restriction requirement among the linked inventions is subject to the nonallowance of the linking claim, claim 85. Upon the allowance of the linking claim, the restriction requirement as to the linked inventions shall be withdrawn and any claim depending from or otherwise including all the limitations of the allowable linking claim will be entitled to examination in the instant application. Applicants are advised that if any such claim depending from or including all the limitations of the allowable linking claim is presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.
